ABOUT ME

Entry-level software engineer with hands-on experience building web-applications using Python (Django, FastAPI) and JavaScript/TypeScript (React, Next.js). Developed backend services with relational databases, frontend applications, and a mobile app using React Native and Expo. Proficient in Python, JavaScript, and TypeScript; comfortable styling with Sass and familiar with Tailwind. Quick learner and strong problem-solver with experience using Git and Agile workflows—seeking a junior/full-stack role to contribute to product development and grow within a collaborative engineering team.

SKILLS

Programming Languages	• Python • JavaScript, TypeScript • HTML, CSS
Backend Frameworks	• Django, Django REST Framework, Django ORM • FastAPI, SQLAlchemy
Frontend Frameworks	• React, Next.js • React Native • Sass, Tailwind
General Skills	• Version Control, Git • Debugging • Unit Testing • Agile Development
Soft Skills	• Problem Solving • Teamwork • Adaptability • Effective Communication

EXPERIENCE

PLANLY Application	• Designed the user interface of the application with respect to the best practices of UI design using "Figma" web-application • Developed the application using "React Native" and "Expo" frameworks and built the final package using "Expo Application Services" • Some of packages I used in the development of this application include: "react-navigation", "react-native-draggable-flatlist", and "react-native-screens"
